International Journal of Theoretical Physics

Volume 32, Number 1 January 1993

CONTENTS

IMPORTANT ANNOUNCEMENT

Jauch–Piron System of Imprimitivities for Phonons. I. Localizability in Discrete Space 1
Zbigniew Banach and Slawomir Piekarski

Jauch–Piron System of Imprimitivities for Phonons. II. The Wigner Function Formalism 23
Zbigniew Banach and Slawomir Piekarski

Similarity Solutions of the Cubic Nonlinear Klein–Gordon Equation 39
Zhang Jiefang and Lin Ji

Stochastic Strings, Topology, and Space-Time Confinement 43
Kh. Namsrai

θ-Structures in Quantum Theory in View of Geometric Quantization 51
Dehai Bao and Zhong-yuan Zhu

Complex Geometry, Unification, and Quantum Gravity. I. The Geometry of Elementary Particles 63
Thomas R. Love

Complex Geometry, Unification, and Quantum Gravity. II. The Generations Problem 89
Thomas R. Love

Covariant Conservation Laws from the Palatini Formalism 109
Rainer Dick

Spacetimes in Which the Ricci Equations Characterize the Riemann Tensor 121
S. Brian Edgar

Singularities, Trapped Sets, and Cosmic Censorship in Asymptotically Flat Space-Times 137
A. Królak and W. Rudnicki

Lifted Transformations on the Tangent Bundle, and Symmetries of Particle Motion 143
R. Maartens and D. R. Taylor

Terminal Model of Newtonian Dynamics 159
Michail Zak

Autonomous Systems, Dynamical Systems, LPTI Symmetries, Topology of Trajectories, and Periodic Solutions 191
G. Gaeta

Generalized Noether Theorems in Canonical Formalism for Field Theories and Their Applications 201
Zi-ping Li

Erratum: Semantic Incompleteness of Quantum Physics 217
Claudio Garola

International Journal of Theoretical Physics

Volume 32, Number 2 **February 1993**

CONTENTS

Geometrical Treatment of Nonholonomic Phase in Quantum Mechanics and Applications 219
P. B. Pereshogin and P. I. Pronin

Hamiltonian Formulation of One-Chain and Two-Chain Systems 237
Usha Kulshreshtha

Classical Spin and Quantum Propagation 249
G. N. Ord

Physical Continuum and the Problem of a Finitistic Quantum Field Theory 261
F. Winterberg

Pre-Regge Calculus: Topology via Logic 279
Roman Romanovitz Zapatrin

Conventional Nuclear Physics Solution of the Solar Neutrino Problem 301
Y. E. Kim, M. Rabinowitz, J.-H. Yoon, and R. A. Rice

Spontaneous Symmetry Breaking in a Time-Dependent Space-Time 319
Anjana Sinha and Rajkumar Roychoudhury

Uncertainty Principle for Generalized Diffusions 333
Erik I. Verriest and Dong-Ryeol Shin

Multidimensional Analogue of Virasoro Algebra and Quantum Higher-Order Water Wave Equation 347
P. Guha and A. Roy Chowdhury

Fractals and Chaos in Cancer Models 353
E. Ahmed

Charge Spectra of Dyonic Quarks 357
J. M. S. Rana and B. S. Rajput

Momentum, Anglar Momentum, and Equations of Motion for Test Bodies in Space-Time with Torsion 373
Fang-Pei Chen

International Journal of Theoretical Physics

Volume 32, Number 3 **March 1993**

SPECIAL ISSUE: Quantum Structures 1, Part II
GUEST EDITOR: G. Kalmbach

CONTENTS

Delinearization of Quantum Logic 389
Slawomir Bugajski

On Classical Representations of Finite-Dimensional Quantum Mechanics 399
P. Busch, K.-E. Hellwig, and W. Stulpe

A Model of Piron's Preparation–Question Structures in Ludwig's Selection Structures 407
Gianpiero Cattaneo and Giuseppe Nisticò

Jauch–Piron States on Concrete Quantum Logics 433
V. Müller

On the Duality between Boolean-Valued Analysis and Reduction Theory under the Assumption of Separability 443
Hirokazu Nishimura

Quantum Structures in Macroscopic Reality 489
D. Aerts, T. Durt, A. A. Grib, B. Van Bogaert, and R. R. Zapatrin

Book Review: The Quantum Theory of Measurement 499

International Journal of Theoretical Physics

Volume 32, Number 4 April 1993

CONTENTS

Generalized Clifford Algebras and Hyperspin Manifolds 503
N. Fleury, M. Rausch de Traubenberg, and R. M. Yamaleev

Feynman Path Integral and Ordering Rules on Discrete Finite Space 517
G. Chadzitaskos and J. Tolar

Krichever–Novikov Operator Formalism and Sewing Conformal Fields 529
Qihua Cheng

New Invariance in Electroweak Standard Model and Conservation of Helicity 541
Bi-chu Wu and Zi-ping Li

Coherent States in the Form of a Quantum Group 545
Lei Ma, Zhong Tang, and Yong-de Zhang

Uniqueness of the Newton–Wigner Position Operator 555
D. R. Grigore

Basic Connection between Superconductivity and Superfluidity 565
Mario Rabinowitz

Ward Identities and Radiative Corrections in QED with Conformal Gauge 575
R. P. Zaikov and S. I. Zlatev

Maxwell Equations, Nonzero Photon Mass, and Conformal Metric Fluctuation 593
G. Kar, M. Sinha, and S. Roy

First Experiment to Test Whether Space-Time is Flat 609
Zhang Junhao and Chen Xiang

Some Remarks on Dirac's Equation in the Tolman–Bondi Geometry 615
Antonio Zecca

Differential Structure of Space-Time and Its Prolongations to Singular Boundaries 625
Jacek Gruszczak and Michael Heller

Test of SS 433 Models 649
Jeffrey M. Cohen and Boris Kuharetz

Rotating Colored Black Hole in $SU(5)$ GUT 655
Hongwei Yu

Inhomogeneous Cosmology with Spinning Fluid in High-Dimensional Space-Time 667
Li Yuanjie

Spherical Symmetry and Mass-Energy in Higher Dimensions 671
S. Chatterjee and B. Bhui

Derivation of Critical Exponents from Extreme Value Distributions 683
B. H. Lavenda and A. Florio

High-Frequency Sum Rules for the Quasi-One-Dimensional Quantum Plasma Dielectric Tensor. II. Spin Effect 693
R. O. Genga

International Journal of Theoretical Physics

Volume 32, Number 5 **May 1993**

CONTENTS

Fiber Braids and Knots 703
Giuseppe Gaeta

Calculating Wadati–Deguchi–Akutsu $N = 3$ Knot Polynomials 713
A. E. M. El-Misiery

Breaking of Permutation Symmetry and Diagonal Group Action: Nielson Model and the Standard Model as Low-Energy Limit 727
Giuseppe Gaeta

Generalization of Quantum Statistics in Statistical Mechanics 737
S. B. Isakov

Modified Factorization Method and Supersymmetric Quantum Mechanics 769
B. Bagchi, K. Samanta, A. Lahiri, and P. K. Roy

More about Superconformal Field Theory. Hamiltonian Formalism 775
A. Foussats, C. Repetto, O. P. Zandron, and O. S. Zandron

Relativistic Quantum Physics Equation for Number of Electrons 791
A. S. Rabinowitch

Six-Dimensional Dirac Equation 801
J. B. Boyling and E. A. B. Cole

Cosmic String in the NUT–Kerr–Newman Spacetime 813
Mainuddin Ahmed and Elias Uddin Biswas

Electromagnetic Tail Radiation in Nonflat Spacetimes 819
Thomas W. Noonan

Bianchi Type III Foliation of the de Sitter Space 841
P. Crawfoed and P. Vargas Moniz

Dynamical Algebras in Classical Mechanics 849
E. Ihrig and G. Rosensteel

Thermodynamics of Impure Anharmonic Crystals 861
Ram Singh, B. D. Indu, R. P. Gairola, and M. N. Sharma

Exact Solutions of Some Nonlinear Equations 879
R. S. Banerjee

International Journal of Theoretical Physics

Volume 32, Number 6 **June 1993**

CONTENTS

Countable Jauch–Piron Logics 885
Peter G. Ovchinnikov

Some Remarks on a Model of Supersymmetric Quantum Mechanics 891
K. Samanta

Quantum Phases and Connections 901
Jan Sladkowski

Tomita Representations of Quantum and Classical Mechanics in a Bra/Ket Formulation 905
Hans H. Grelland

Noncommutativity and Transition Probability in Quantum Mechanics 927
B. Rumbos

Average Quantal Behavior and Thermodynamic Isolation 933
Elihu Lubkin and Thelma Lubkin

Equivalence of Dirac and Maxwell Equation and Quantum Mechanics 945
Jayme Vaz, Jr. and Waldyr A. Rodrigues, Jr.

Derivation of Quantum Maxwell Equations from Relativistic Particle Hamiltonian 961
A. O. Barut and Bo-wei Xu

Classical Frames for a Quantum Theory—A Bird's-Eye View 969
Slawomir Bugajski

Weyl Equation in Some Anisotropic Stiff Fluid Universes 979
Luis O. Pimentel

Geometric Structures Approximated by Maxwell's Equations 985
Geoffrey Martin

Dirac Spinors in an Inhomogeneous Cosmological Model 1005
S. K. Srivastava and K. P. Sinha

Post-Newtonian Estimation in Relativistic Optics 1013
G. Zet and V. Manta

Finsler and Kaluza–Klein Gauge Theories 1021
R. G. Beil

Energy-Momentum Complex of Gravitational Field in the Palatini Formalism 1033
Jan Novotný

Homogeneous Anisotropic Cosmological Models with Variable Gravitational and Cosmological "Constants" 1041
T. Singh and Anil K. Agrawal

Spherically Symmetric Perfect Fluid Solutions of Einstein's Equations in Noncomoving Coordinates 1061
W. B. Bonnor and H. Knutsen

International Journal of Theoretical Physics

Volume 32, Number 7 **July 1993**

CONTENTS

Diagonal Harmonious State Representations 1069
E. C. G. Sudarshan

A New Interpretation of Bell's Inequalities 1077
E. C. G. Sudarshan and Tony Rothman

Introduction to SH Lie Algebras for Physicists 1087
Tom Lada and Jim Stasheff

Path Integral Evaluation of the Eta Function 1105
D. G. C. McKeon and T. N. Sherry

Spinor Strong Interaction Model for Meson Spectra 1111
F. C. Hoh

Higgs Mechanism without Higgs Particle 1135
H. Dehnen and H. Frommert

Fuzzy Logics and Observables 1143
Radko Mesiar

Partial-State Formalism and the Object–Subject Split in Quantum Mechanics 1153
Fedor Herbut

Object–Subject Split and Superselection Partial States 1173
Fedor Herbut

Noncommutative Mean Ergodic Theorem for Partial W^*-Dynamical Semigroups 1187
G. O. S. Ekhaguere

Condensed Matter Effects on Nuclear Fusion Rates in Laboratory and Astrophysical Environments 1197
Y. E. Kim, M. Rabinowitz, and J.-H. Yoon

WKB Approximation for a Quarkonian Equation 1225
